

Ahmed Mansour

BIM-Oriented Technical Office Engineer | Roads & Infrastructure | Civil 3D & Automation Specialist

Senior Technical Office Engineer with 7+ years of experience in civil infrastructure and building projects, specializing in roads, landscape, and utilities. Proven track record in delivering high-quality shop drawings, BOQs, and technical submittals for large-scale developments.

Skilled in BIM and digital engineering workflows, with advanced expertise in Autodesk Civil 3D (road design and pipe networks), InfraWorks, and Navisworks. Experienced in developing Dynamo scripts to automate Civil 3D processes, reducing manual effort and improving productivity. Currently expanding capabilities in Revit to enhance BIM integration across multidisciplinary projects.

Demonstrated ability to coordinate with consultants, contractors, and multidisciplinary teams to resolve design conflicts, optimize quantities, and ensure alignment between design and site execution. Contributed to improved project efficiency, reduced rework, and timely delivery across multiple infrastructure and building projects.

Key Skills: BIM, Civil 3D, InfraWorks, Navisworks, Dynamo, Revit (Basic), Quantity Surveying, BOQs, Shop Drawings, Technical Submittals, Road Design, Pipe Networks, Design Coordination, Construction Documentation.

Work Experience

Senior Technical Office Engineer, El-Alfy Contracting Company Marble and Granite Works

Aug 2025 - May 2026

- Delivered detailed shop drawings for high-end marble and granite works, achieving fast-track approvals and minimizing revision cycles.
- Optimized material utilization through advanced slab layout planning, reducing material waste and overall project costs.
- Led coordination between design, production, and site teams, ensuring seamless execution from fabrication to installation.
- Improved documentation workflows and submission tracking, enhancing project efficiency and turnaround time.
- Reduced material waste by 10%.
- Handled 70+ drawings / submissions.

Senior Technical Office Engineer, Farag Sultan Contracting and Transportation Establishment (Earthwork & Roads)

Jun 2021 - Jul 2025

- Delivered 150+ shop drawings and as-built drawings for roads, landscape, and infrastructure works, achieving high consultant approval rates and minimizing revision cycles.
- Performed quantity take-offs and BOQ preparation for multiple large-scale projects (SODIC East El Shorouk and Mountain View Aliva), improving estimation accuracy and reducing material waste.
- Coordinated with multidisciplinary teams (site, consultants, and subcontractors) to resolve design conflicts, reducing site rework by approximately 20%.
- Utilized Civil 3D for road design, improving design efficiency and accuracy.
- Supported project planning and execution by managing RFIs, transmittals, and technical submissions, ensuring timely approvals.

Consulting Engineer, Housing & Building National Research Center (HBRC)

Jul 2020 - May 2021

Project: **Social Housing Project – New Obour City**

- Represented the consultant/client side in supervising construction activities, ensuring full compliance with approved drawings, specifications, and Egyptian construction codes.
- Reviewed and approved contractor submittals, including shop drawings, materials, and method statements, ensuring technical accuracy and adherence to project requirements.
- Conducted site inspections and quality audits, identifying non-conformities and issuing NCRs and corrective actions, contributing to improved construction quality.
- Monitored project progress against schedule, identifying delays and risks, and recommending corrective measures to maintain timelines.
- Coordinated with contractors and stakeholders to resolve technical issues and ensure proper implementation of design intent.
- Enforced QA/QC procedures and safety standards across site activities, supporting consistent compliance throughout the project lifecycle.

Executive Engineer | Site Engineer, Al-Maraj Building & Construction

Apr 2018 - May 2020

Projects: **R1 / R2 Residential Districts, New Capital (NAC)**

- Managed execution of residential building projects in the New Administrative Capital, ensuring compliance with design, quality, and schedule requirements.
- Led coordination between consultants, contractors, and stakeholders, improving communication and project efficiency.
- Supervised site activities and quality control processes, ensuring adherence to specifications and reducing defects during handover.
- Prepared progress reports, cost tracking, and project updates for senior management.

Skills

BIM & Digital Engineering

- Civil 3D (Road Design, Pipe Networks)
- InfraWorks
- Navisworks (Clash Detection)
- Dynamo (Automation)
- Revit (Basic)

Technical Office

- Shop Drawings & As-Built
- Quantity Surveying & BOQs
- Technical Submittals
- Method Statements
- RFI & Document Control

Project & Site

- Design Coordination
- QA/QC & Compliance
- Construction Documentation
- Infrastructure & Roads

Educational Background

- **Bachelor of Civil Engineering**
- **Higher Institute of Engineering and Technology in Kafr El Sheikh**

Languages

- Arabic (Fluent)
- English (Proficient)

Certifications & Courses

BIM & Engineering

- BIM Infra – CADMASTER
- BIM Fundamentals – Coursera
- BIM Applications – Coursera

Programming & Automation

- CS50P – HarvardX
- CS50X – HarvardX

Additional Information

- All courses & experience certificates are available on my LinkedIn account.
